REVIEW SESSION ACTIVITIES

CSC 1401 Spring 2025
Fatima Zahra Iguenfer

WELCOME TO CAFE1401

the **Cafe Order Management System** that allows a cafe to handle customer orders efficiently.

Display the Menu

- The system should display the following menu to the user:
  - Iced Latte 30 Dh
  - Americano 25 Dh
  - Cappuccino 12 Dh
  - Caramel Mocha 45 Dh

Handle multiple users

- repeatedly ask if there is a new customer.
- If there is a new customer, the system should proceed to take their order.
- If there are no more customers, the system should calculate and display the total revenue for the cafe.

Handle multiple orders

- Allow each customer to make multiple <u>valid</u> orders
- After a customer selects an item, the system should ask for confirmation
  - If the customer does not confirm, the system should allow them to reselect an item
- If the customer chooses not to add another item, the system should calculate and display the total cost for their order.

Compute total

- After a customer finishes ordering, the system should calculate and display the total cost of their order.
- After all customers have placed their orders, the system should calculate and display the total revenue for the cafe.
